

CCCN Registry Patient Selection Criteria

1. Individuals 18 years of age and older

AND

2. Individuals whose primary medical home is a provider located in Santa Cruz County

AND

3. Individuals who have over the previous 24-months met one or more of the NCQA/HEDIS clinical criteria for diabetes shown below:

Two different ambulatory or non acute inpatient encounters with different dates of service with a diagnosis of diabetes:

- 250.0-250.9 (diabetes)
- 357.2 (polyneuropathy in diabetes),
- 362.0 (diabetic retinopathy),
- 366.41 (diabetic cataract) and
- 648.0 (diabetes in pregnancy)

EXCLUDING patients with

- steroid-induced diabetes (962.0) and
- gestational diabetes (648.8)

OR

One encounter in an acute inpatient or emergency room setting with a diagnosis of diabetes:

- 250.0-250.9 (diabetes)
- 357.2 (polyneuropathy in diabetes),
- 362.0 (diabetic retinopathy),
- 366.41 (diabetic cataract) and
- 648.0 (diabetes in pregnancy)

EXCLUDING patients with

steroid-induced diabetes (962.0)
gestational diabetes (648.8)

OR

Members dispensed an insulin or oral hypoglycemics /antihyperglycemics on an ambulatory basis.

EXCLUDING patients with

- polycystic ovaries (258.4)*,
- steroid-induced diabetes (962.0) and
- gestational diabetes (648.8)

*Exclude members with a diagnosis of polycystic ovaries that do not have any face-to-face encounters with the diagnosis of diabetes, in any setting, during the prior two years.

Note: Data will “look back” for services rendered in the prior 24 months.
